Cover Letter

Dear Mr Brecht,

I am applying for the Furniture Technician (Assembly & Service) position. For the last six years I have installed office furniture for a Berlin dealer - from single day offices to whole floors - and what I like most is the mix of precise hands-on work and direct contact with customers.

Reliable delivery is what our project managers praise me for: dates hold, the site is swept, and the handover is done calmly and completely. Safety is second nature for me - safe lifting, protecting finished floors, correct use of PPE, and a tidy, secured work area in occupied buildings. Quality for me means the snag list is empty on handover day, not next week.

Most installs run as a two-person crew, so teamwork with colleagues, electricians and facility managers is my daily routine. Communication with customers matters: I explain what will happen, listen to wishes, and find a practical solution when a wall is not straight or a part is missing.

I would like to bring this routine to kitchens and fitted wardrobes at Kantholz and grow with your service team.

Sincerely, Aisha Ndiaye
