Cover Letter

Hi,

I saw your ad for a furniture technician and here is my application. I have been putting together furniture since my moving-company days - first flat-pack assembly at delivery addresses, and since 2023 proper furniture assembly jobs through a marketplace app, more than 200 of them, 4.7 stars.

I show up on time, I bring my own drill and tools, and I read the assembly instructions before opening a single box - learned that the hard way once. Customers like that I explain what I did and take the packaging with me. My rule is simple: careful work, no scratches, no missing screws.

I grew up in Neukoelln, speak Berlin German natively, and I am used to hard physical work. I would like to do this for one company now instead of chasing app jobs all over the city - steady quality work in a team.

Hope to hear from you.

Kevin
