## Cover Letter

Dear Ms Vogel,

I studied interior design because I love furniture - and I would love to start my career at a company that actually builds and installs it. As a junior technician I could contribute my drawing skills and my sense for materials, and learn the workshop side step by step.

During my studio year I visited the workshop weekly, prepared drawings for custom pieces, and watched our designs being built - my thesis on adaptable micro-apartment furniture even got prototyped. I can read and produce technical drawings, check measurements against plans on site, and document what was built - skills that should help with accurate assembly work.

I know I have not yet worked on site as a fitter - that is exactly the experience I am looking for. I am a fast learner, careful with materials, and I communicate openly with clients and colleagues. My German is still basic (A2), but I am enrolled in an intensive course this autumn.

I would be grateful for the chance to prove my motivation in a trial.

Sincerely, Sofia Popescu
