Application (Letter + CV combined)

Dear Hiring Manager,

I am writing to apply for the position of Doctoral Researcher in Machine Learning at your faculty. I completed my Master of Science in Computer Science at Technische Universitaet Hamburg in 2024; my thesis developed anomaly detection with autoencoders in PyTorch for industrial sensor data. Two semesters as a tutor for mathematics taught me that I enjoy teaching assistance as much as research. I value your group's commitment to open science and interdisciplinary collaboration, and I would be proud to contribute to it.

Sincerely, Omar Haddad

Curriculum Vitae - Omar Haddad # Education MSc Computer Science, Technische Universitaet Hamburg (2021 - 2024), grade 1.9. Thesis: "Autoencoder-Based Anomaly Detection for Industrial Sensor Data". BSc Computer Science, Universitaet Aleppo (2014 - 2019).

Work experience Working student, autonomous driving startup (2022 - 2024): sensor data quality analysis in Python, test automation.

Skills Python, PyTorch, Git, statistics, machine learning, communication in international teams.

Languages Arabic (native), German (C1), English (C1).
